Projects

Sportr   [live site](#) | [github](#)

HTML5, Python, Flask, SQLAlchemy, PostgresSQL, React/Redux, Render, AWS

Sportr is inspired by Flickr. It is a full-stack web application that allows photo sharing through AWS

- Utilizes AWS to upload photos for others to view
- Designed and deployed with react js and a flask python backend in under two weeks
- Harnessed the unidirectional state management of Redux to simplify React components and directly manage data for form inputs and form submissions.
- Adhered to React and ES6 best practices to generate a true single-page reactive web app experience.

Snack-Overflow   [live site](#) | [github](#)

Python, Flask, SQLAlchemy, React / Redux, PostgreSQL, Render

SnackOverflow is a clone of StackOverflow. This is a full-stack web application that has to do with food-related questions

- Designed and deployed with react js and a flask python backend in under two weeks in a group environment implementing 4 Create Read Update Delete (CRUD) features.
- Implemented custom search using redux
- Harnessed the unidirectional state management of Redux to simplify React components and directly manage data for form inputs and form submissions.
